EDUCATION

CHRIST (Deemed to be University), Bengaluru

BBA, Applied Finance with FinTech
2026 – Present

Jnanodaya PU College, Mysuru

Pre-University Education
2024–2026

Ideal Jawa Rotary School, Mysuru

School Education
2012–2024

SKILLS & TOOLS

LANGUAGES

Python, JavaScript

BUILDING WITH AI

AI-assisted development, System design
APIs & integrations

PLATFORMS EXPLORED

Claude Code, Cloudflare Workers/KV/R2
Workers AI, Raspberry Pi, Google Cloud
Platform, Ollama with Claude Code, Kaggle.

Next.js, React Native / Expo, WebSockets

WhatsApp & Telegram APIs

RECOGNITION

- Government of India INSPIRE Award—₹10,000 funding for the Pothole Tracker, 2nd PUC
- Certificate of Recognition — Unmesha Physics Club Lead Member, 2025–26
- CuriousJr—Python Developer Certificate, Dec 2022
- CuriousJr—JavaScript Certificate, Nov 2022

■ Profile

BBA student in Applied Finance with FinTech, passionate about making AI useful beyond the computer science classroom. I'm a technology-oriented builder rather than a traditional software engineer—I use AI-assisted development to turn ideas into working products while focusing on system design, technology selection, databases, APIs, integrations, and product decisions. I've built across AI, robotics, computer vision, mobile products, and civic technology, and I organize student science activities and community initiatives. I want to help other students become confident AI builders, regardless of their major.

■ Selected Builds

Pothole Tracker [Civic AI](#) 2025–Present

Designed and iterated an AI-powered civic reporting system end-to-end—from a self-hosted Telegram prototype to a WhatsApp + Cloudflare Workers version—connecting citizen input, AI analysis, storage, geolocation, and a municipal dashboard. Funded by the Government of India's INSPIRE Awards.

Advanced Rover [AI + Robotics](#) 1st–2nd PUC

Designed and integrated an AI-enabled Raspberry Pi rover with camera streaming, web control, real-time communication, and computer vision—exploring how hardware, web systems, and AI perception work together.

Codes of Memory [AI / Vision Experiments](#) 1st – 2nd PUC

Explored Raspberry Pi computer vision, object inspection, visual reasoning, and generative 3D workflows by connecting different AI and technology components.

Resume Builder [Mobile Product](#) 1st – 2nd PUC

Built an offline-first mobile resume/profile product with structured data, dynamic education fields, and on-device PDF generation and sharing—working from product requirements to system architecture.

■ Leadership & Community

Lead Member, Organizing Committee, [Unmesha Physics Club](#) 2025–26

Organized science model-making competitions for high school students under the faculty in charge; recognized with a certificate signed by the HOD of Physics and the Principal.

Vice President, [Rotary Interactive Club](#), 9th Standard

Supported social awareness and welfare activities and student-led community initiatives.

ATL Labs Ambassador [Ideal Jawa Rotary School](#) 9th Standard

Participated in a student innovation and tinkering environment and represented the ATL ecosystem as a student ambassador—combining technology exposure with social-awareness activities.
